

Joomla Jump - Get the jump on Web 2.0!

We are a web development company with a focus on SEO and social media promotion

When we started developing websites over 10 years ago, we used the Joomla platform for content management, hence the name: Joomla Jump - Get the Jump on Web 2.0

While we still develop many sites using Joomla, now Wordpress - another content management system - has grown in popularity and options for enhancing that platform have exploded. We determine which platform is best when speaking with our clients, and you can't go wrong with either!

Take a look at our recent site development and conversion taking an existing site from out-dated static pages to a clean and sleek dynamic site using Wordpress.

How the site looks today:

How the site looked prior:

- Ready to go online for the first time with your business, book or product?
- Need an overhaul on an existing site?
- Want more traffic? Contact us to find out more about how we can help you!

Using Joomla as your Ultimate Toolbox for your Website

For a new person, one of the most confusing AND most critical parts of Internet Marketing, is creating a Web Site with the necessary Technologies and Tools.

Starting with the wrong tools and concepts is a major mistake and can easily have a dramatic effect on your ability to success.

The Ultimate strategy of a new business is to apply your strengths and abilities wisely, backed by great personal discipline. This requires you to outsource any task that requires skill, knowledge and experience you do not currently have and that you cannot acquire EASILY.

Static Pages are a big mistake...

Trying to provide a lot of content with individually-created pages will likely drive you crazy...

You must have plenty of Content for the search engines.

You MUST involve Community Building in your business model in order to succeed.
